What is working

- No strong opportunity cluster is confirmed yet; monitor trend and activity pressure.

What could go wrong

- The trend backdrop is inactive, so price action has not confirmed a constructive regime.
- Price is below the Trend Line, which keeps downside pressure in focus.
- Price is below Fair Value, so the market is still discounting the latest tape.
- Activity pressure is negative, which weakens the current setup.

What to watch next

- Trend Line remains the key weekly regime level.
- Activity pressure is the gauge to monitor for confirmation or fade.
- A volume ratio above 1.5x would show stronger participation in the next move.

How to read this

Quality and valuation are separate questions. A strong company can still carry a demanding valuation, so profitability, growth, balance-sheet strength, and the price paid for those characteristics should be assessed independently.

The latest factor snapshot indicates quality is middle-of-the-pack; growth is moderate; valuation is neither clearly cheap nor expensive.
