EXECUTIVE READ

What matters now

Top-level conclusion, primary support, and the main restraint in the current weekly setup.

Conclusion

The strongest supporting evidence is indicator analysis: Latest 12-week confirmation: trend 12/12, activity pressure 2/12, relative leadership 12/12. The main constraint is patient capital: Activity-pressure buy-signal evidence highlights potential institutional accumulation windows. The combined read is balanced, making the next change in trend, sentiment, or options pressure especially important.
