What is working

- Price is above the Trend Line, keeping the weekly tape constructive.
- Activity pressure is positive on the latest completed week.

What could go wrong

- The trend backdrop is inactive, so price action has not confirmed a constructive regime.
- Price is below Fair Value, so the market is still discounting the latest tape.
- Activity pressure is weak, so confirmation is not yet broad enough.
- The share remains more than 20% below its 52-week high.

What to watch next

- Trend Line remains the key weekly regime level.
- Activity pressure is the gauge to monitor for confirmation or fade.
- A volume ratio above 1.5x would show stronger participation in the next move.
