What is working

- The trend backdrop is active with a 1-week active streak.
- Price is above the Trend Line, keeping the weekly tape constructive.
- Activity pressure is positive on the latest completed week.

What could go wrong

- Price is below Fair Value, so the market is still discounting the latest tape.

- The share remains more than 20% below its 52-week high.

What to watch next

- Trend Line remains the key weekly regime level.
- Activity pressure is the gauge to monitor for confirmation or fade.
- A volume ratio above 1.5x would show stronger participation in the next move.

How to read this

Quality and valuation are separate questions. A strong company can still carry a demanding valuation, so profitability, growth, balance-sheet strength, and the price paid for those characteristics should be assessed independently.

The latest factor snapshot indicates quality is middle-of-the-pack; growth is moderate; valuation is neither clearly cheap nor expensive.
