EXECUTIVE READ

What matters now

Top-level conclusion, primary support, and the main restraint in the current weekly setup.

Conclusion

The strongest supporting evidence is patient capital: Activity-pressure buy-signal evidence highlights potential institutional accumulation windows. The main constraint is weekly tape: Trend, activity pressure, participation, and risk combine to a 24/100 tape read. The combined read is defensive, so risk control and evidence of stabilization matter more than headline upside.
